Levels of Readiness defined by Operational Conditions (OPCON)

OPCON 4

This condition describes day-to-day operations including training and preparedness activities that do not require an activation of the Firefighter Mobilization Plan (FFM).

OPCON 3

FFM staff and/or regional personnel are monitoring an emergency situation or disaster that may require an activation of the Firefighter Mobilization Plan. SEMS users may be provided general information via email about an emerging incident or situation.

OPCON 2

The Firefighter Mobilization Plan has been activated due to an emergency incident. SEMS users can log into the database to view full request details along with general incident information. A state-wide mutual aid channel on the Palmetto 800 radio system has been activated.

OPCON 1

In addition to the actions taken in OPCON 2, the State Fire Marshal's Command Center (FMCC) has been activated (803-735-0998). The State Emergency Operations Center (SEOC) may be open at this time. If the SEOC and ESF 4 (Firefighting Support Function) are activated, the FFM Plan will work in conjunction with the State Emergency Operations Plan, and the FMCC may relocate their operations and personnel to the SEOC.
